How are credits used for scheduling? [Hide This](#)

Package Credits Package Credits are received when you purchase packages. Package credits can be set up for different types of services (location rentals, appointments, camps/classes and leagues). If you have one package credit, it is good for one service regardless of the price of the service. Be sure to use package credits before they expire • there will be no refunds for unused package credits.

Example: If you buy a package of 5 passes, you will receive 5 package credits. When you sign up for the class, you will only need one package credit for each class regardless of the price of the class.
